FULL-STACK WEB DEVELOPER|COMPETITIVE PROGRAMMER|AI-TRAINER|BELIEVER

WORK EXPERIENCE

INSA
Full-stack developer
2025 ,June - present(two months)

Worked on the Broker Hub website, a platform connecting sellers with buyers. Built and integrated front-end and back-end features, optimized database performance, and ensured a seamless and secure user experience. (Group Project)
Github repo: https://github.com/Bez-coder/Summer-Camp-Group-3/tree/main/broker-app

Personal Project
AI trainer(LLM)
2025,May-July (two months)

Worked on a full stack application to train large language models with a focus on local context and Amharic language support. Contributed to data preparation, model fine-tuning, and building tools to improve usability and accuracy for local users.
Live-preview: https://ethiopian-chatbot.onrender.com

Personal Project
Full-stack Developer
2025,July-present (one month)

Built a bus booking app with user authentication, seat reservation, and payment integration, ensuring a smooth booking experience.
Github Repo:https://github.com/honu5/Guzo-Bus-booking-app

ACHIEVEMENTS

Top score on University Enterance

Scored 571/700 on National University Entrance Exam, ranking among the top students nationwide.
Certificate : https://drive.google.com/file/d/11KW5aMHbprA_k9IDo7MO2UM6d6Ed3Jae/view?usp=sharing

I solved 100+ problems on LEETCODE

Solved 100+ coding problems on LeetCode, strengthening algorithmic and problem-solving skills.
Leetcode Profile: https://leetcode.com/u/lirans/
